油壓迴路圖

| 名稱 Name                                              | 外掛接頭型中實迴轉油壓缸<br>HYDRAULIC CYLINDER WITH JOINT BRACKET |      |
|------------------------------------------------------|-------------------------------------------------------|------|
| 規格 Spec. / 型號 Model                                  | RC-85                                                 |      |
| 活 塞 面 積<br>Eff. piston area                          | 伸側 Extend cm <sup>2</sup>                             | 43.8 |
|                                                      | 拉側 Retract cm <sup>2</sup>                            | 47.1 |
| 行程<br>Piston stroke mm                               | 20                                                    |      |
| 最高使用迴轉數<br>Max. speed r.p.m.                         | 6000                                                  |      |
| 最高使用壓力<br>Max. pressure kgf/cm <sup>2</sup>          | 35                                                    |      |
| GD <sup>2</sup> Moment of inertia kgf m <sup>2</sup> | 0.012                                                 |      |
| 重量<br>Weight kgs                                     | 6.8                                                   |      |
| 總洩漏量<br>Total leakage liter/min                      | —                                                     |      |

- 洩油孔配管務必單獨接回油槽，以避免產生背壓。
- The drain port should be independently connected to oil tank to avoid back pressure.
